

Piusi AdBlue Filter

Piusi 3D AdBlue Filter

Prevents the contamination of AdBlue during transferring operation

The Piusi 3D Filter is specifically engineered to protect AdBlue® from contamination during transfer operations, helping to extend the life of your vehicle's SCR system.

Designed to remove debris and crystallisation, this highly efficient mechanical filter prevents damage that can occur during filling and transferring, ensuring your vehicle remains within warranty.

Featuring a durable technopolymer filtering element housed in a protective polyamide casing, it comes with 1" BSP fittings for easy installation. For optimal performance, it is recommended to replace the AdBlue® filter annually.

Functioning

Typical conditions of the filter after 20,000 litres dispensed. We recommend changing the filter cartridge once a year

High efficiency mechanical filtration of particulate by means of an incremental filter specifically developed for AdBlue.

Dimensions

Measurements expressed in millimeters

Features

- ▶ 3 Step Filtration
- ▶ Hi-Resistance Case
- ▶ Removable Cartridge

Performance

- ▶ 200 β Filtering Capacity
- ▶ Up to 4 Bar operating Pressure

Materials

- ▶ Body: Technopolymer
- ▶ Cartridge: Polypropylene

In The Box

- ▶ 3D Filter
- ▶ Instruction Manual

Packaging
